

Dangerous Goods Training - Shipping Goods by Air

Course Duration

Qualifier/Re-qualifier - 3 Days/2 Days

Course Objective

This course is intended for those who need knowledge on shipments of Dangerous Goods by Air or those who will become shippers of those goods.

Candidates will gain a working knowledge of the IATA regulations which govern the classification, identification, packing, marking & labelling and documenting of goods for transit by Air freight internationally or domestically.

Course Content

In this course we will cover:

- The Nine Classes of Dangerous Goods
- How to identify Dangerous Goods with a UN Number and Proper Shipping name
- How to select and interpret the correct packing instructions for specific goods
- How UN specification packing is tested and what the requirements are
- How to choose the correct packaging for specific goods and identify the quantity limits within packages
- How to mark and label specific goods in accordance with the regulations
- How to complete and understand Dangerous Goods Transport Documents

Candidate Requirements

Strong understanding of operational environments

Qualifications Gained

Candidates will gain certification to be able to pack and ship Dangerous Goods by Air. Candidates will also be registered with a CAA student number, as a qualified shipment.

Course Cost

Qualifier - £440+VAT

Re-qualifier - £360+VAT

"The training I had with DG Solutions was perfect. The trainer brought actual aircraft parts to explain what about them was Dangerous Goods and why—these were the same as the units I ship every day!"

- Alex Gee
